Joyce -

A Homa Hills landowner that has his property near Def-Tech for sale called today asking to be placed on the mailing list for results of the analysis performed Friday. He lived out in the area for 5 years and moved into Casper in March. As a result of the coverage on Def-Tech and difficulty selling his Homa Hills property, he is now finding that he needs to be involved to hopefully recover some of his losses. Contact Information:

He reported nothing overly unusual during my brief conversation with him today, though he did mention that Def-Tech had tested some tear gas that drifted to his location plus they routinely setting off explosions.

Chris
